

PARIVARTAN REPORT

Date: 30-3-2012

PLACE- Slums near by bypass

TEAM: Swati manda, Manaram, Mahesh chand gurjar, Sanjay rajak, Sourabh Singh

FROM WHERE THEY ARE- They are from pali dist. ,village- Jawali ,cast -madari.They do not have any "SARPANCH" or "PANCH".Because they do not have any voter id card(AS they told us).

EDUCATION LEVEL- Nobody goes to school.Some of them know only simple counting from 1 to 10. or simple english words abcd.Nobody wants to go to school.

SOURCE OF INCOME- They generally show the "MADARI GAME(BAZIGAR)". Some of them go to work in factory or as labour in road making etc. Their children generally collect polythine from road sides. They collect 20-30 Rs each day by selling these polythine or plastic boxes and by these ruppees they eat gutkha and tobacco(Data according to their parents but we did not see at that time eating gutkha and tobacco)

RESIDENCE- They live under a tent of cloth ,sleep on the ground,cook their food on chulha(of soil).

HEALTH- They don't have hygiene near by them ,they generally caught in infections.They don't take advice or medicine from doctor.They adopt traditional treatment. They even don't take bath daily. I saw one of them drunked wine.(so I think they drink wine also).

WHAT IS THEIR TENDENCY- They don't want to improve themselves. They think that they are in good position at present. They don't need others help. If someone suggest them then they say we are fine already we have much money,good education, and better life style But really they are not like this.

THEIR HABBIT- Generally they show games but they are involved in theft like social evils also(Information from other people living near by them). Most of them lie So their children are also adopting same tendency.

WORK WE DID -Simple interaction with children and their parents. Played with children.showed

them paper aeroplane. Asked their name called them by their name motivated them to sing a song or dance or telling time from a wall clock or on showing magic tricks by them by giving toffees or giving them our cellphones. We showed "APaNAPAN"(affinity) to those people to listen us and to follow our advice. Asked about their daily routine activity .At last some of the children were ready to play with us(who were not ready in beginning.).But no one was ready to go school.

WHAT IS OUR NEXT PLAN-Our next plan is to realize their needs or to create their needs by comparing them with other people life style.

MY VIEW: I think this field is the most challenging field for our parivartan team.This will be very difficult to change their life style or improve them even a bit .According to me we have to wait for a long time to see any output from their side but I do not think till that time they will exist here(in Jodhpur) . Because they usually live at a place for (about) 4-5 years(As they told).We talked to psychology Mam on this issue then she said ,"According to me you are doing illegal work ,because you are motivating other people also of their village to come here like them by distributing clothes to them ,they may also involved in social evils like these people" and she said that you should work more for those who really need your help and for whom your help can change their life.

NOTE: I made this report very hastily due to lack of time ,so if I have left any information ,my all team members are most welcome for their suggestions.
