

PARIVARTAN

DATE OF VISIT :-27th june 2012

PLACE:- A Small village near GPRA

WHAT WE FOUND:-*When we arrived in the village we found that most of the people are homeless and living near the jodhpur city for the work. we interact with them and want to know that why they are living this type of life, they told us that they all are moving here and there to get work and therefore they leave their villages,there villages are about 40 km away from that vary place ,where they are living at the present.they all are looking on us with a hope.when our team enquired about their facilities provided by the government ,they told us that they don't have much knowledge about these facilities,we made them familiar about the various facilities of the government,Which are their rights and we gave the information about some of the government policy as BPL,RAASHAN CARD,HEALTH CARD.*

We also came to know that some of the people have already this type of informations,when we asked why should they are not taking these advantages, they told us that from past 2 years they are trying to get these facilities but the local government body avoiding them and not taking their demand seriously.we encouraged them and gave advice how they legally can get their rights.their children wanted to read but their economic condition led them to work and earn money instead of study.We saw ardor in their eyes to learn and to go step by step with society.

SOURCE OF INCOME :-*The main source of income of these people are from labour work and also their children work as ragpickers.They used to make radium number plates , women income come from their handicraft such as they made decorative items but they get very less wages as what they expect.The whole family income is very less so they cannot afford basic needs of life (Roti,Kapada,Makan) .*

RESIDENCE:-*They all are living in very harsh condition,As they are living in tent which is made up of plastic and other materials.Hardly to survive in a extreme weather.*

CHILD MARRIAGE:-*Most of us know, that they marry their children earlier due to lack of thinking and lack of awareness of disadvantages of child marriage but after intraction with them we came to know that “SECURITY “is also one of the main cause of child marriage.*

HEALTH:-*Due to lack of awareness about hygiene,they are living in insanitary condition.they do not know about the government health facilities which are being provided for their welfare.*

WHAT WE DID :-*We encourage the parents to admit their children to school which will make their life better and aware about the society happenings and as well as their rights.Made aware about the government health policy,gave information about the proceess of making health card,raashan card.We also ensure them that we will help their children in their study to make their future bright.*

Our view:-*we want that the people of this community have better life and they will also run step by step with the society which will also help in the development the country.*
